SLA Target vs. Actual Resolution Time (Top Bottlenecks)

Breach Delay Severity Distribution (Top Services)

SLA Breach Rate by Suburb & Key Service Areas

Suburb	Park Cleaning	Graffiti Removal	Tree Maintenance Services	Damaged Bins	Missing Bin
Carlton	84.78%	66.36%	44.39%	40.00%	34.81%
Carlton North	60.87%	68.16%	36.00%		33.33%
Docklands	38.46%	64.60%	49.09%	44.74%	25.00%
East Melbourne	66.67%	63.57%	34.98%	37.00%	41.86%
Flemington	100.00%		50.00%	66.67%	
Kensington	69.23%	71.27%	43.92%	33.93%	36.97%
Melbourne	77.36%	51.75%	42.60%	47.28%	43.56%
North Melbourne	84.91%	71.11%	42.60%	34.00%	32.40%
Parkville	63.49%	70.53%	38.62%	37.50%	34.94%
Port Melbourne	100.00%		42.11%	57.14%	69.70%
South Wharf	100.00%	66.67%			
Total	**76.88%**	**62.76%**	**41.21%**	**39.49%**	**37.62%**

Strategic Recommendations & Next Steps

1. **Adjust SLA Targets for Specialist Services (Parking Meters)**
   - **Root Cause:** 3-day SLA target is misaligned with complex field repairs, leading to a 71.2% breach rate and 92.5 days resolution average.
   - **Action:** Tier SLAs by complexity (3 days for software resets vs. 30-45 days for hardware replacements) and enforce vendor turnaround terms.

2. **Deploy Dedicated Park Maintenance Crews to Geographic Hotspots**
   - **Root Cause:** City-wide performance failure (76.9% breach rate), heavily concentrated in North Melbourne (84.9%) and Carlton (84.8%).
   - **Action:** Shift from central dispatch to dedicated field crews stationed directly at high-density inner-north park clusters

3. **Optimize Work Routes and Add Seasonal Capacity for Graffiti Removal**
   - **Root Cause:** Massive request volume (~5,800 breaches), though 92% of delays are minor to moderate (under 30 days).
   - **Action:** Group Implement automated geographic route batching and engage on-demand contractor capacity during peak influx periods.
